

UPDATES TO THE BOARD MEDICAL FEE SCHEDULE PUBLISHED SEPTEMBER 1, 2001

TO BECOME EFFECTIVE AUGUST 15, 2004.

1. Make edits to third paragraph on page 6 as follows:

It is important to recognize that the listing of a code number, the service or procedure and the approved fee are not restricted to a specific specialty group. Any procedure or service and fee listed in this book may be used to designate the services rendered by any qualified physician. Such services, however, must be performed within the scope of his/her licensed practice as defined by Georgia law. The Georgia State Board of Workers' Compensation fee schedule is the reimbursement guideline for Georgia facilities and providers. Occasionally an individual who is injured in another state will seek treatment from a medical provider in Georgia. In such a case, the injury may not be under the jurisdiction of the Georgia Act. If the injury is under the jurisdiction of another state's workers' compensation act, the policy and procedures listed in this manual would not apply.
